

# THE TRAINER SYSTEM™

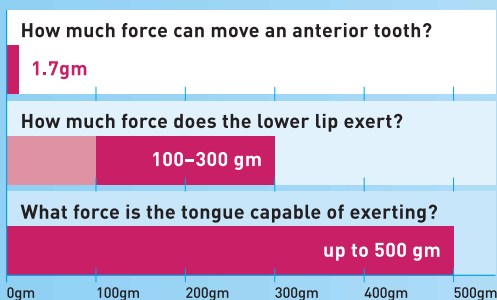

“Improves dental and facial development.”

Mouth breathing, tongue thrusting, incorrect swallowing and other myofunctional habits cause crooked teeth, poor facial development, and other common problems. The tongue and lips control dental position and should be considered in conjunction with any orthodontic treatment.

## MYOFUNCTIONAL FORCES

## SYSTEM APPLIANCES

MIXED DENTITION		<b>PRE-ORTHODONTIC TRAINER</b> Improves facial and dental development in the growing child.
DURING BRACES		<b>TRAINER FOR BRACES</b> Shields the soft tissue from brackets.
DURING BRACES		<b>CLASS II CORRECTION</b> Specific for jaw alignment in combination with fixed orthodontics.
PERMANENT DENTITION		<b>TRAINER FOR ALIGNMENT</b> Aligns and retains teeth in the permanent dentition.

All appliances in the Trainer System™ correct tooth alignment, jaw positioning, and Soft Tissue Dysfunction. If left untreated, Soft Tissue Dysfunction can cause poor facial growth, unstable orthodontics, and TMJ Disorder.
