

“Patients don’t want complex stuff, they want pain relief!”

Studies show that 35% of the population, including adolescents, suffer from varying degrees of Temporomandibular Joint (TMJ) disorder. Every TMJ patient has different symptoms, making diagnosis difficult for the Medical and Dental professionals.

DAYTIME: TMD™

INTRA-CAPSULAR

The **TMD Appliance™** is semi-flexible, **customisable**, allows clear and easy speech, and is ideal for daytime use.

INTRA-CAPSULAR:
The TMD Appliance™ works best to ease symptoms associated with the jaw joint and bone structure.

NIGHT TIME: TMJ™

EXTRA-CAPSULAR

The **TMJ Appliance™** is a prefabricated intra-oral appliance designed for the immediate and effective treatment of TMJ Disorder.

EXTRA-CAPSULAR:
The TMJ Appliance™ works best to relax the facial muscles.

The use of the two phase system covers the dual complexity in diagnosis whether the problem is just the Joint (intra-capsular) – clicking, pain in the joint or limited opening, or a cranio-mandibular/MPD type disorder (extra-capsular).

**THE TMJ SYSTEM™ BY MRC:
IMMEDIATE AND EFFECTIVE
DIAGNOSIS AND TREATMENT**
